

SREEVATSAV PRASATH

MECHANICAL ENGINEERING STUDENT

CONTACT

- +91 8867650302
- sreevatsavprasath@gmail.com

SKILLS

CAD

- Solidworks, Fusion 360** used for 3D modeling various designs
- AutoCAD** and solidworks used to draft 2D engineering drawing

PROGRAMMING

- PYTHON
- MATLAB

MECHANICAL

- Fabrication
- Manual Machining
- Laser cutting

PROJECTS

DESIGNING PLANETARY ACTUATOR

- Designed a quadruped actuator with a 1:6 planetary gear reduction.
- Used off the shelf parts so that the actuator can be easily built without having to manufacture custom parts.

INTERCEPTOR DRONE | ongoing

- Developing a inexpensive drone which can fly at 200-220 kmph, and using vision based proportional navigation to home into targets.

TEAM GNARLY | BATTLE BOT

- Co-Designed and manufactured a 15 kg Battle bot.
- We won 2nd place at VIT VELLORE and performed well in IIT-M Tech-fest

EXPERIENCE

ASTRM Intelligence labs

MAY-JULY 2026

Resident Fellow

- Designed and integrated a differential-drive rover with a pan-tilt camera system, custom electronics and firmware.
- Integrated PX4 with custom motor-driver and servo interfaces, enabling control of the rover's drive and camera systems.
- Developed vision-based tracking and follow modules for autonomous rover operation.
- Designed and prototyped a laser turret for vision-based target tracking and autonomous aiming.

Placestation | WTFund C3

AUGUST - OCTOBER 2025

Design Intern

- Designed **fixture systems** that replaced traditional springs, improving modularity and **reducing dependency on imports**.
- Contributed to **packaging design** for a fully in-house product, optimizing manufacturability and part accessibility.
- Developed **electronics enclosures** for the Pick and Place machine, enabling cross-compatibility across different variants.

CSD ROBOCON NITK

2024 - 2025

BASKETBALL ROBOT | SEMI-AUTONOMOUS BOT

- Part of a 30 member team which built a **semi-autonomous robot** that can play basketball, which includes tasks such as **shooting, passing and dribbling a basketball**.
- Designed and manufactured a ball intake roller mechanism using **SolidWorks**.
- Applied DFM principles through multiple iterations, **increasing performance by 23%** and **10% weight reduction**.
- Used power tools and laser cutting to make rapid prototypes of the designs to check for feasibility of the mechanisms.

EDUCATION

National Institute of Technology, Karnataka

2023 - 2027

Bachelor of Technology in Mechanical Engineering

GRV PU College

2020 - 2022

2nd PU
